Sir or Madam:

REMARKS

The substitute specification is submitted to correct a typographical error. The substitute specification differs from the initial specification in that the substitute specification has a line spacing on the specification, claims, and abstract that is double-spaced as instructed in 37 CFR § 1.52(b)(2)(i). The substitute specification differs further from the initial specification in that the page numbers are now centrally located, as described in 37 CFR § 1.52(b)(5). Finally, the substitute specification differs from the initial specification in that a gap of approximately four spaces follow the paragraph numbers, as suggested in 37 CFR § 1.52(b)(6). No new matter has been added to the specification. As the substitute specification only incorporates format changes of the initial specification, to conform with 37 CFR § 1.52(b), new matter is not added.

In view of the foregoing, this application is now believed to be in condition for formal allowance. Prompt and favorable action is respectfully requested.

Date: October 24, 2001

Respectfully submitted,

Frederic Douglas
